Recreating nature with porcelain

sukabumiporcelain.com

Welcome to Sukabumi Porcelain
exclusive from TileLine

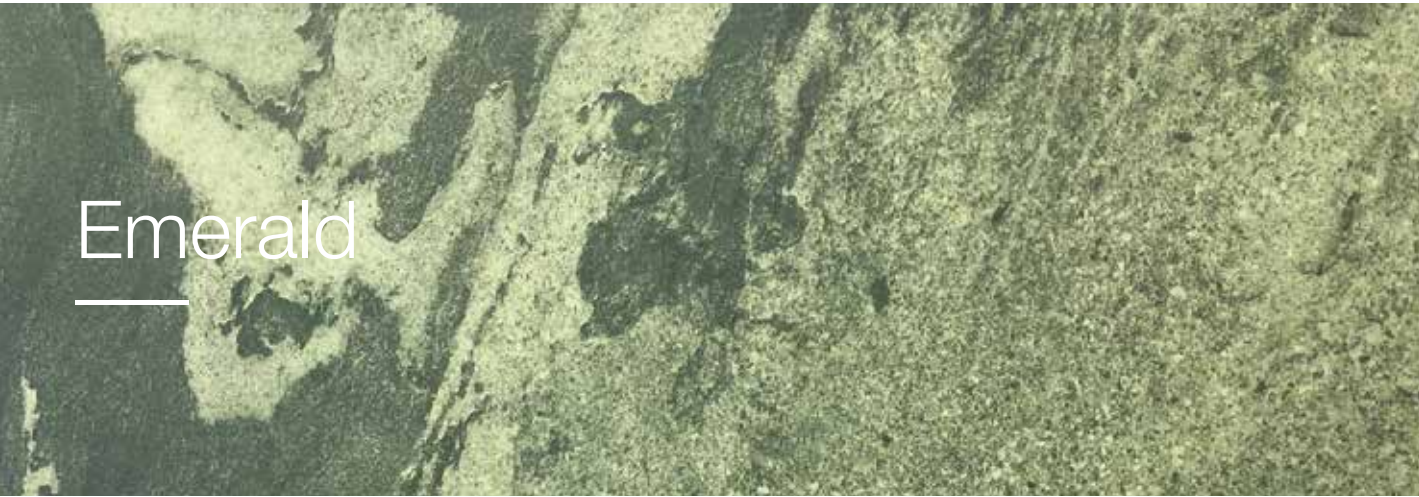

The new Sukabumi Porcelain range evokes a sense of luxury often used for beautiful swimming pools and striking landscape designs.

Sukabumi Porcelain is an excellent option for outdoor pools and landscaping thanks to its durability and low water absorption of less than 0.5%, this is the ideal product for any water feature or swimming pool as it requires low maintenance. Sukabumi Porcelain is the practical choice for architects and designers, due to its unique advantages over stone. We have developed Sukabumi in striking shades of greens, blues, sandstone and grey, a combination of which allows you to create your own bespoke look.

This Indonesian natural stone look is popular with architects and designers who seek a luxurious aesthetic, but at an affordable price. We can customize Sukabumi Porcelain to suit your needs and to provide continuity and rectification. You can decide on the percentages of colour to give you that personal touch.

Sandstone

Why porcelain?

Porcelain is an excellent option for the outdoors thanks to its durability and low water absorption of less than 0.5%, this is the ideal product for any water feature or swimming pool as it requires low maintenance.

As well as being the practical choice, Sukabumi Porcelain is similarly the cost effective one, as architects, designers and home owners alike do not have to worry about the rejection of tiles throughout the application process.

Bespoke design

The Sukabumi Porcelain Tiles come in 4 different variations: Light, Medium, Dark, and Pattern. You are able to create your own bespoke design with the combination of these 4 tiles. For example you could have 50% light, 20% medium, 20% dark and 10% pattern. These combinations create amazing designs unique to your pool.

The underwater effect

Whilst the Natural Sukabumi stone needs to be underwater to truly showcase its colours, the beauty of Sukabumi Porcelain is able to be captured out of the water, making it an amazingly versatile addition for your pool or garden, presenting an array of shades that differ with water depth, natural sunlight, and your bespoke design.

The logical alternative

Sukabumi Porcelain has been developed to imitate the appearance of natural stone, yet without the headaches that often arise in the application and maintenance of natural stone.

Sukabumi Porcelain is suitable for all types of pools, landscaping, cladding, and even spas, providing you with the individuality that your project requires.

EMERALD COLLECTION

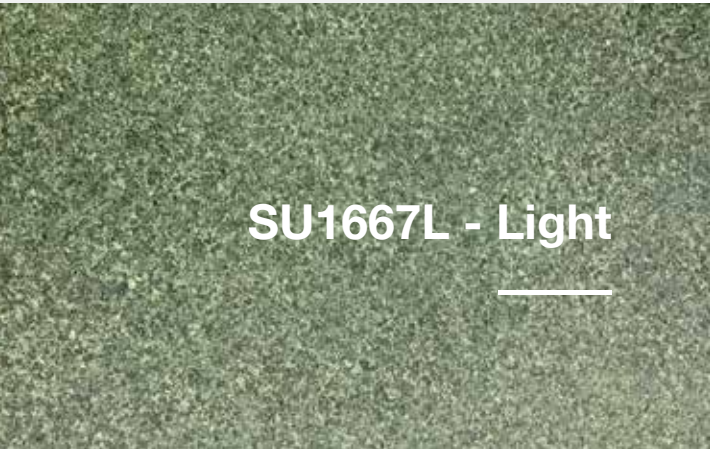

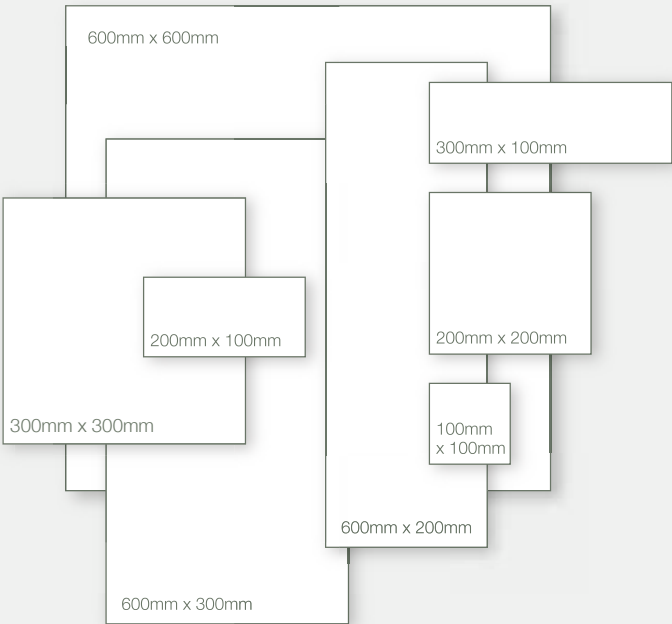

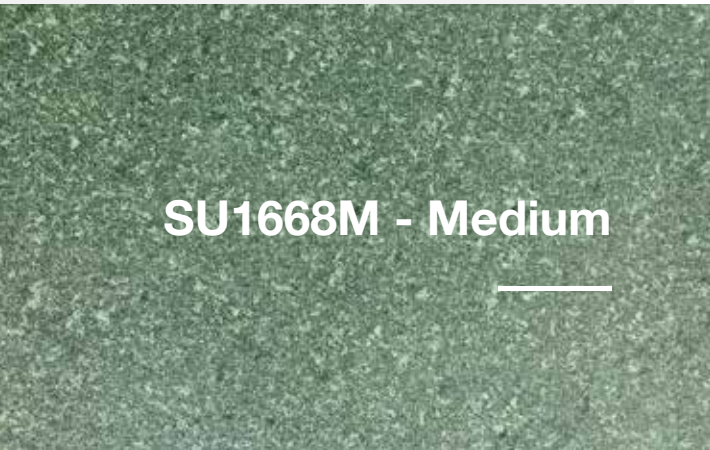

Soft greens of the Balinese mountains

The serene textures and colouring of this collection evoke the feeling of floating above the soft volcanic greens of the Javanese mountains.

We are aiming to recreate nature in the form of porcelain, imitating the beautiful Balinese stone colours in your pool. Sukabumi your home.

SUKABUMI SANDSTONE

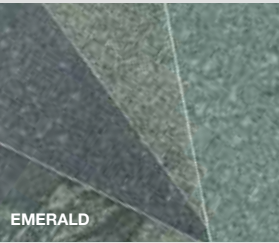

SUKABUMI MOONSTONE

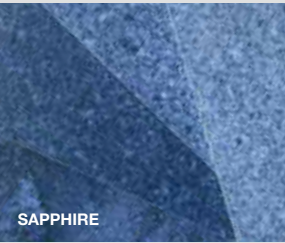

Sukabumi Porcelain has been developed to provide you with unlimited design options. There are a total of sixteen individual colours that can either be used separately or combined together.

There are 4 colour palettes and four shades per collection: Light, Mid, Dark and Pattern which are all available in the four colour ranges: Sapphire, Emerald, Moonstone and Sandstone.

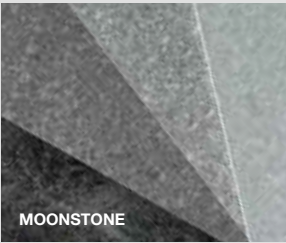

All sixteen colours are produced on a standard size of 600mm x 600mm. However, you can choose not only your required size, but you can also play with the colour percentage, in return providing you with total design control and allows you to create your own piece of tranquility, wherever you may be.

SANDSTONE

There are 4 colour palettes and four shades per collection: Light, Mid, Dark and Pattern which are all available in the four colour ranges: Sapphire, Emerald, Moonstone and Sandstone.

Design visualization

Generating 3D models for client’s visual understanding.

We can interpret the sketch idea into renders for client’s reference and approvals, we aim to give them an idea of how our Sukabumi Porcelain tiles in different sizes and colours will look like in design reality, this is an excellent way if a client is unable to understand or visualize how their pool or landscape will look.

Sample patterns & sizes:

EMERALD
200 X 100MM
RUNNING BOND

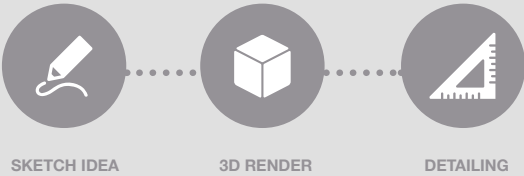

SAPPHIRE
300 X 100MM
HERRINGBONE

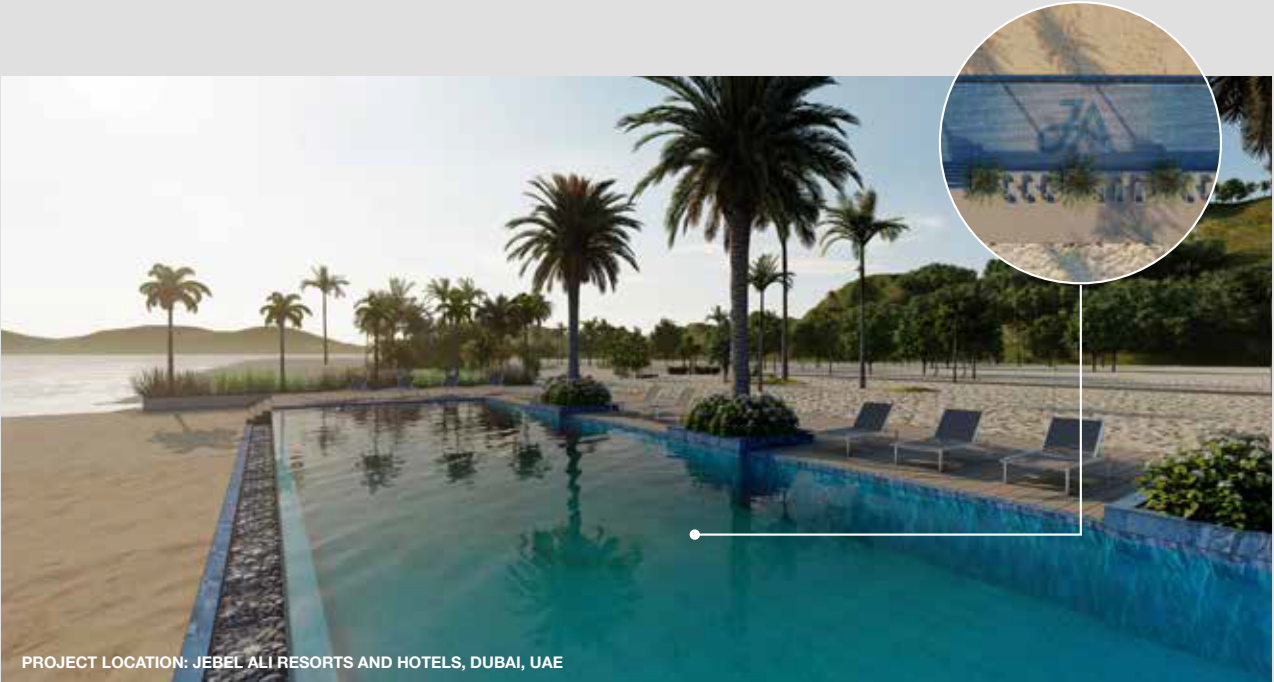

MOONSTONE
100 X 100MM
SQUARES

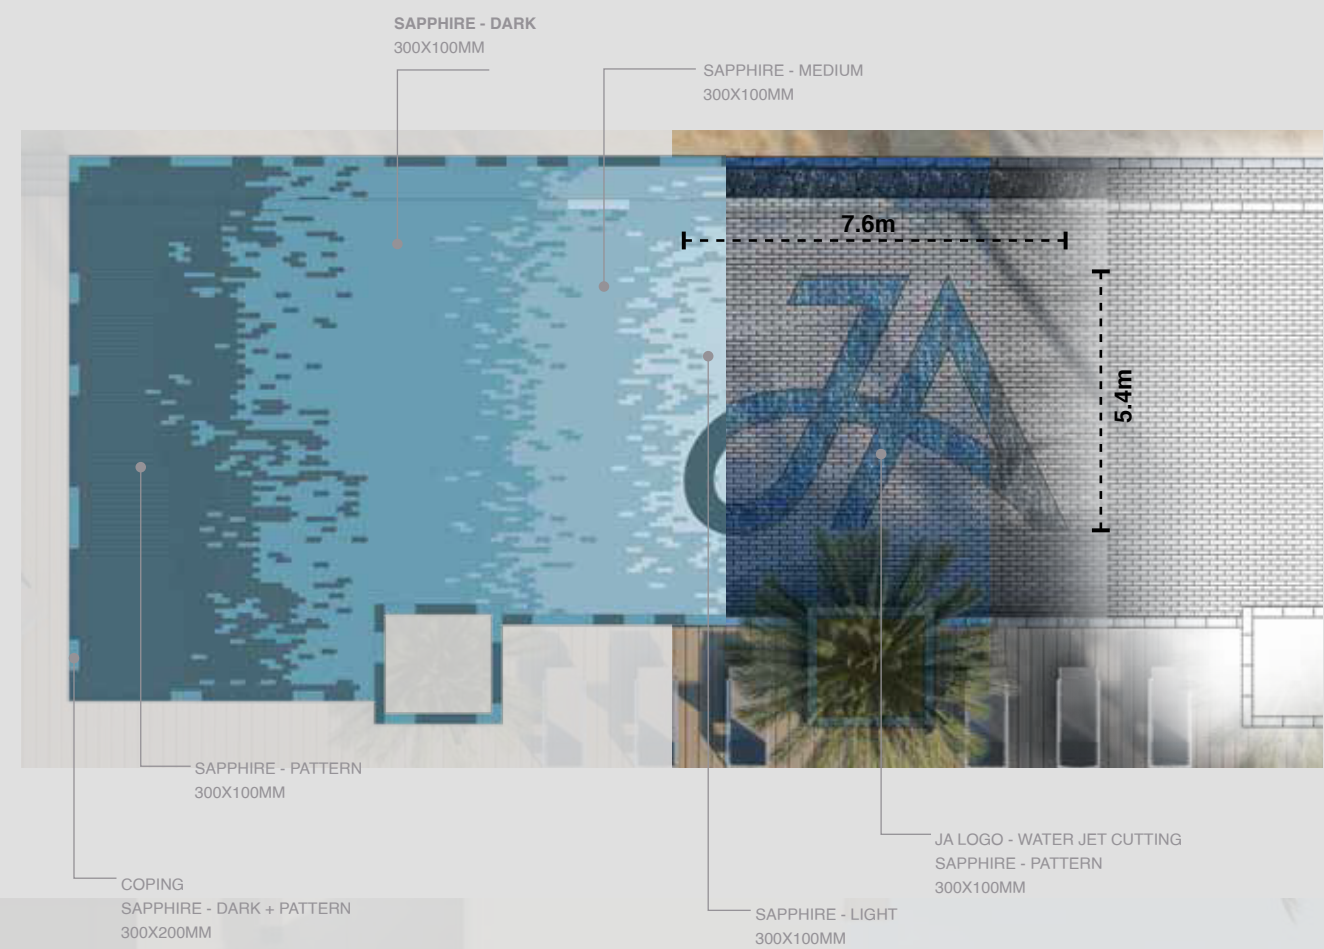

SANDSTONE
400 X 400MM
BLOCKS

Even with renders, we assure that the precision and accuracy of what the client envisions will be as close as what will be on site. We can provide design options through rendering the chosen patterns and colors in the same view to differentiate their outcomes.

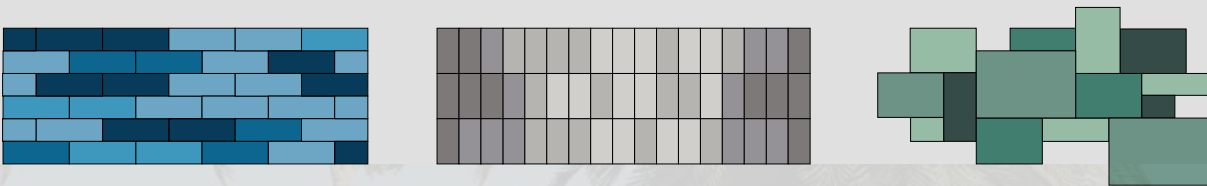

Design details and specifications

Preparing and producing computer aided drawings of the approved proposal containing detailed specifications for construction.

We as a team help the contractors through our supervision services to ensure that the details provided are well followed and as per the standards set for our prodcuts. We help as well in any change that may occur due to some inevitable site constraints.

and then delivering it!**

As a supplier, we don't just supply,
we engage, we evaluate and we propose.

Key advantages to Sukabumi Porcelain

Maintenance issues with natural Sukabumi Stone vs Sukabumi Porcelain.

- 01.** Unlimited design options - larger format - sizes starting from 600mm x 600mm and can be cut to any size required
- 02.** All tiles are rectified and therefore eliminate wastage not like natural stone
- 03.** Total design control - choose the % of the shade and size from any of the colours
- 04.** 16 unique design options
- 05.** Water absorption less than w/a 0.5% (non porous)
- 06.** Zero maintenance
- 07.** Cost effective against stone
- 08.** 10 year warranty
- 09.** Manufacturing continuity, quality control and consistency between productions

Why Sukabumi Porcelain v's Natural Stone

Natural green Sukabumi is considered to be a lava stone and is grey or bluish in colour yet, when immersed in water, the stone turns a beautiful Emerald green colour, For areas that are above water, however, for areas that are not underwater, the stone remains a dull grey colour and is not generally in keeping with the overall colour or aesthetics of the pool.

This can often present problems, you will see from the image on the right, the top line is not under water and when water splashes the area repeatedly and dries out, the stone starts to break down and deteriorates over a very short period of time. Consequently, the effect of crumbling can occur within a maximum period of 6 months, unless sealed and constantly maintained.

Due to natural Sukabumi being porous, it does not like being exposed to salt or chlorine and in turn, this increases the speed of deterioration, and ultimately the failure of the stone.

Any seller of natural Sukabumi swimming pool tiles should have a thorough understanding of the nature of the stone and its potential problems.

Unlike other natural stone, green Sukabumi is not quarried in the traditional sense where large blocks are cut out from the side of the mountain. Due to the nature of the stone and the mountain from which it is quarried. The quarries are only able to produce small sized (30 to 60) blocks rather than in a larger format, whereas Sukabumi Porcelain starts as a 600 x 600 and can be fabricated to any size downwards. The standard tile size that is available in natural stone is therefore limited to 10x10, 15x15 and 20x20 cm tiles, which in the end provides limited design options..

The stone formation from which the stone comes contains many iron nodules and complex layers. This produces large colour variations from light green to dark brown. Only a few quarries are able to produce a stable colour without the existence brown discolouration. There are also zones within the stone formation that have excessive alteration (hot steam going through the stone), causing the blocks and tiles from that area to be very fragile and difficult to work with. Material from these impacted areas are not suitable for commercial purposes, and therefore only further add to the issues that arise in the application and maintenance of natural stone.

Sukabumi Porcelain - 10 year warranty

In this sense, the advantages of using Sukabumi porcelain significantly outweigh the benefits of using natural stone. With Sukabumi Porcelain, architects, designers and homeowners do not have to worry about tile maintenance due its durability and low water absorption of less than 0.5%. Similarly, the absence of any porous material in Sukabumi Porcelain will result in an easy installation process.

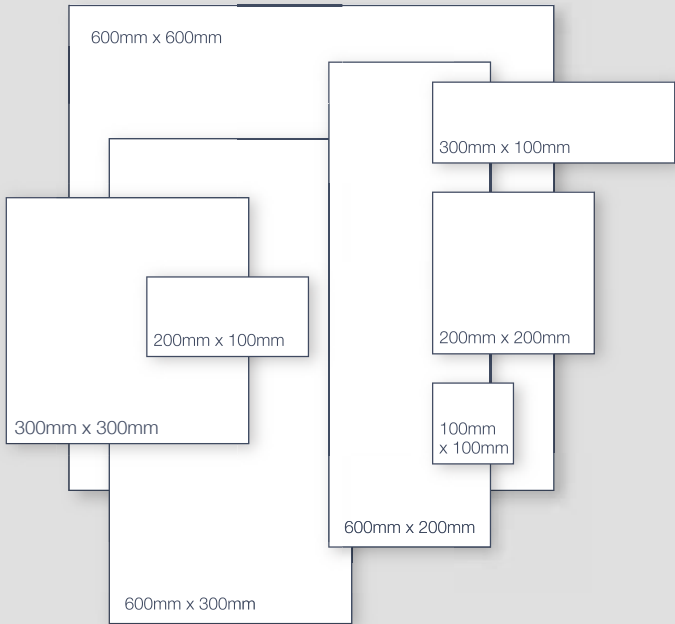

Sukabumi Porcelain is the practical and most affordable choice for any pool or water feature. We develop and offer a total of 16 colours, ranging from greens, blues, beige pallets, and have recently developed a new collection; moonstone, in which offers a contemporary lava stone palette.

Welcome to our new state of the art landscaping showroom

We are proud to the launch of our NEW purpose built landscape showroom in Dubai

Whether you are a landscape designer, contractor, or a homeowner looking to redesign your pool and garden, come and experience this amazing new space that showcases the industry leading standard materials for luxury landscaping design. Let us inspire you!

Mission:
Our mission is to help our customers make distinctive, reliable and significant enhancements to their unique projects, and to create a work environment that is empowering, creative and adaptive.

Vision:
To be the regional turnkey consultants of choice for any indoor and outdoor design requirements.

www.tileline.ae

Established in Dubai in 2015, TileLine is a British owned regional production company, specialising in consultancy and the supply of ceramic, porcelain and mosaic flooring applications for award winning commercial and residential projects.

Experience has lead TileLine to become trusted advisors to the region's most prominent businesses across both private and public sectors, working on projects from luxury 5 Star hotels and resorts, amusement parks, community destinations, as well as creating luxury exterior spaces for individual homeowners that reflect their particular style and refined taste. TileLine have extensive industry knowledge, that has been grown from vast international travel, that enabling us to support design at the conceptualisation phase and facilitate those who want to value-engineer their individual projects.

Tileline consults on and recommends the best options from a myriad of the top manufacturers around the world including: Viewgres (exclusive), Norstone and Florina Ceramics. Our current range includes 10mm, 20mm and the robust 30mm porcelain tiles for both indoor and outdoor requirements.

In addition, TileLine has developed their own brand, Sukabumi Porcelain. A range that evokes a sense of luxury often used for beautiful swimming pools and striking landscape designs. The Sukabumi Porcelain range is currently available in 4 distinctive collections, Sapphire, Emerald, Sandstone and Moonstone that compliment any theme or landscape design.

DL DECKLINE

Welcome to the world of DeckLine, where nature and technology are fused together in perfect harmony.

DeckLine composite decking is made from premium grade recycled high density plastic and hardwood fibres which has been responsibly sourced (FSC Certified).

The result is that our product is made with 92% recycled materials: 32 recycled HDPE + 60% reclaimed wood fibres + 8% additives.

By combining recycled materials with hi-tech manufacturing methods, we have created a long lasting, durable, environmentally friendly and sustainable product.

DeckLine decking is the perfect modern day building material. Our decking is covered by a 10 year residential and commercial limited warranty with a +20 year life expectancy.

www.deckline.ae

SL SLABLINE

The beauty of large format porcelain.

Small tiles are a thing of the past, today we welcome large format for both walls & floors in both residential and commercial interiors, large format tiles have become increasingly popular as they provide a stunning appearance due to their minimal lines. The strong visual impact of this contemporary style is a favorite of homeowners, designers and contractors alike.

www.tileline.ae/slabline

ML MOSAICLINE

The creation of MosaicLine helps our clients design, source and install endless designs of mosaics, whether the concept is simple or has murals

MosaicLine is the result of our constant commitment towards the development of production technique and creativity of design. Every single chip of our Mosaic is an impeccable combination of world-class quality and artistic touch, made to serve all kinds of Architectural requirements.

www.tileline.ae/mosaicline

What our clients say...

"Tileline has supplied in many of my projects and I am extremely impressed with the level of personal service and outstanding quality of their products. I am looking forward to continue our work together in delivering quality landscapes and developing innovative applications using their materials."

Leo Gonzales - Senior Landscape Architect at DAMAC

"Brian always delivers, whether expectations, promises or materials. Some of the best Client focus in the business. I have no hesitation in recommending him to anyone in the market"

James Dickson - CEO of Al Abbar Group

"As the market continues to evolve demanding bespoke solutions it is the type of innovation that Brian and his team provides that supports designers and construction professionals alike in delivering the highest quality projects."

Christopher A. Brown - Director of AECOM

"The swimming pool industry has for a long time been looking for cost-effective alternatives to natural stone finishes. Your innovation of the Sukubumi replica finishes in a tile is a remarkable achievement. As well as providing a 1st class product solution, your service support shows your passion for the business. I am pleased to recommend Tileline to prospective clients."

Frank Mason - CEO Absolute Group
